It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the redrilling, and the dates, state, rate, fall, and if any casing was "struck" or left in the well. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or balling.
