(County or Subdivision)

## New Nation

(State or Territory)

The elevation of the derrick floor above sea level is 600 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

April 19, 1956. After drilling to 1,993' with rotary rig (top of "Matured Cliffs 1988") - set 62 joints of 5-1/8" OD 15.5# casing at 1992' with 100 sacks cement. Moved off.

April 21, 1956. Moved in cable tools. Three hour test showed no water.

April 26, 1946. After drilling to 2282', loaded 190 quarts solidified nitro-glycerin from 2281' to 2282' - tamped with 6" gravel and 1 1/2" calseal. Unloaded at 3:00 A.M. April 27th. Then sand oil treated from 1992' to 2282' with 17,500 gallons diesel oil and 30,000# sand. Flushed with 2,150 gallons diesel oil. Breakdown pressure 1800#. Injection 17.3 barrels per minute.

April 25, 1996. Glowed out to 2082° (Yn). Then ran 93 joints (2053°) of 1" tubing - landed at 2061°. Shut well in for potential test and to await pipe line connection.

**I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.**
