February 10, 1961

R & G Drilling Company
Box 1848
Farmington, New Mexico

Gentlemen:

Effective February 9, 1961 we have ordered the gas purchaser to shut in your #42 Marron well Unit M-22-27N-8W.

This is a dually completed well in the Blanco Mesaverde and Basin Dakota formations. On January 19, 1961 you were notified by letter from this office that a packer leakage test had not been received. At that time you were notified that the well should be scheduled for packer leakage test within 10 days or be shut in. As we have had no response from that letter we have no alternative but to cancel the allowable and shut this well in.

If you have any questions regarding the above, please contact us.

Yours very truly
