File: B-2075-400.1

Subject: Non-Standard Spacing Unit
M. N. Galt "J" No. 1
Angels Peak Dakota Field

Mr. A. L. Porter (2)
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Sir:

Pan American Petroleum Corporation has completed the M. N. Galt "J" No. 1, 790 feet from the south line and 1750 feet from the west line, Section 6, T-27-N, R-10-W, San Juan County, New Mexico, as a Dakota gas well adjacent to the Angels Peak Dakota Field. The acreage dedication for this well is 331.42 acres consisting of the W/2 of Section 6.

In accordance with the provisions of Order No. R-1287 establishing special rules and regulations for the Dakota producing interval in the San Juan Basin, it is respectfully requested that Pan American be given administrative exception for a non-standard spacing unit of 331.42 acres for the M. N. Galt "J" No. 1. The unorthodox size of the tract comprising the W/2 of Section 6 is due entirely to a variation in the legal subdivision of the United States Public Lands Survey.

The non-standard unit for M. N. Galt "J" No. 1 also consists of contiguous quarter-quarter sections or lots lying wholly within a single governmental section. The length of the non-standard unit does not exceed 5,280 feet and the entire unit may reasonably be presumed productive of gas.

We are furnishing copies of our request for a non-standard spacing unit for the M. N. Galt "J" No. 1 to offset operators by registered mail so that they will be informed of this proposal.

Very truly yours,

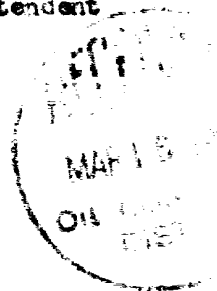

PAN AMERICAN PETROLEUM CORPORATION
