(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

August 11, 1951

Well No. 3 Thompson is located 1650 ft. from N line and 990 ft. from E line of sec. 3  
SE/4 Sec. 3 27N 12W NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
West Kutz Canyon San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5908 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Rotary tools were used from the surface to total depth of 1645' and 1550' of 5-1/2" casing was cemented with 100 sacks. Plug was pumped down and tested for 2 hours with no drop in pressure.

Cable tools were moved on 8-3-51 and the plug was drilled and the hole cleaned out to total depth 1645, and it was found that the hole was dry and that a satisfactory cement job was had.

The test showed approximately 1-1/2 mcfg from the Pictured Cliffs formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
