Re: Excess Shut in on a Commingled well.

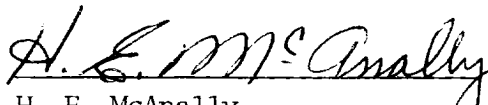

Dear Mr. Chavez:

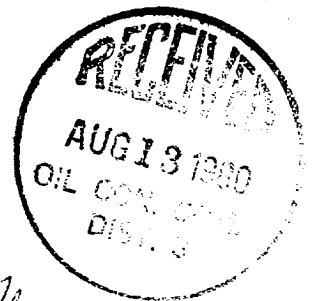

The Blanco #15 (PM) commingled well in K 36-28-08, Rio Arriba County, New Mexico was shut in July 27, 1980 for equipment repair and returned to production August 12, 1980. N.M.O.C.C. order number R-5495 requires that any shut in period in excess of seven days be reported to you.

The equipment repair should solve the producing problem with this well and no further shut in should be necessary.

If further information is needed, please call.

Yours very truly,

H. E. McAnally
Senior Production Engineer
