Subject: E/2 Section 30 - 27N-11W

Please forward to Joe Hammond.

We have received a copy of the communitization agreement for the E/2 of section 30, 27N, 11W for the Basin Fruitland Coal with your note indicating an error in our records and a request for a change of dedicated acreage.

The existing dedication of the S/2 of the section to the #44 well reflects the form C-102 submitted by DeKalb in 1991. This well has been completed in the Basin Fruitland Coal gas pool and tested to produce in paying quantities.

Because of our approval of a C-104 for the #41 well, you must submit a form C-102 showing the dedication change for the #44.

Note that the 5 year limit for Temporary Abandonement of the #44 well expires this year and the well will need to be retested or plugged and abandoned.
