API No. 30-045-29740
Unit K, Section 11, Township 27 North, Range 11 West, NMPM,
San Juan County, New Mexico.
South Kutz-Gallup (Oil – 96852),
Basin-Fruitland Coal (Gas – 71629) and
Basin-Dakota (Prorated Gas – 71599) Pools*

Dear Mr. Stowe:

Reference is made to your recent application for an amendment to amended Division Order No. DHC-2379 dated July 21, 1999, which order authorized the downhole commingling of South Kutz-Gallup and Basin-Dakota Pool production within the well, to add the Basin-Fruitland Coal Gas Pool as a third commingled zone in the well.

It appearing that the subject well qualifies for approval for such amendment pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

The applicant shall consult with the supervisor of the Aztec District Office of the Division upon completion and testing of the well in order to establish a fixed allocation of production from each of the commingled zones. Upon approval by the Division's Aztec District Office, the applicant shall submit the allocation formula to the Santa Fe Office of the Division.

REMARKS: The operator shall notify the Aztec District Office of the Division upon implementation of commingling operations.

Pursuant to Rule 303.C.(2), the commingling authority granted herein may be rescinded by the Division Director if conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 8th day of August, 2001.
