12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

XTO Energy plans to downhole commingle this well in the following manner:

1. Perforate, acidize & frac the Blanco Mesaverde from approximately 4,500' - 5,150'
2. Set a composite bridge plug @ 4,100'.
3. Perforate, acidize & frac the Otero Chacra from approximately 3,800' - 3,900'.
4. TIH & DO CBP @ 4,100'.
5. Turn well to sales.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

RE: Administrative Approval to Downhole Commingle  
Florance D #13B  
660' FSL & 800' FWL  
Unit M, Section 20, T-27-N, R-8-W  
San Juan County, New Mexico

Dear Mr. Chavez:

XTO Energy, Inc hereby requests administrative approval to downhole commingle the above referenced well. Attached for your reference are the following exhibits:

1. Sundry Notice (NMOCD Form C-103)
2. Tabular and Graphical Production History used for Production Allocation

This well is currently permitted as a Blanco Mesaverde (72319) and Otero Chacra (82329). Both zones are included in the pre-approved pools established by Division Order R-11363. The Blanco Mesaverde and Otero Chacra will be completed from approximately 4,500' – 5,150' and 3,800' – 3,900'. Based on production analysis of wells located in a nine section surrounding area the following allocation was determined:

Otero Chacra (82329)	Oil – 0%	Gas – 24%
Blanco Mesaverde (72319)	Oil – 100%	Gas – 76%

Both pools have common interest owners. Commingling both zones will not reduce the ultimate recovery of either pool. Downhole commingling will improve recovery of liquids, eliminate redundant surface equipment and maximize productivity. Once NMOCD approval has been received notice will be filed with the BLM on Form 3160-5 concerning this matter.
