17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Plan to plug and abandon the well in the following manner:

1. Set a plug from 6393' (T.D.) to 6084', which is 50' above the Dakota.
2. Set a 100' plug at 5303-5203', which is 50' above and below the Gallup.
3. Perforate and squeeze the Mesaverde at 3182' and set a 100' plug from 3282-3182'.
4. Set a 100' plug at 1755-1655', which is 50' above and below the Pictured Cliffs.
5. Set a 100' plug at 1480-1380', which is 50' above and below the Fruitland.
6. ~~Perforate and squeeze sufficient amounts of cement to cover the Ojo Alamo and set a 200' plug at 825-625'.~~ (See attached modifications)
7. ~~Perforate and squeeze the surface casing shoe at 417' and set plug at 417-317'.~~
8. ~~Set a plug at surface, set P & A marker,~~ cut off anchors, clean up and reseed location.

Farmington, New Mexico 87499-00600

Attachment to Notice of   Re: Permanent Abandonment

Intention to Abandon   Well: 1 Knauff B

CONDITIONS OF APPROVAL

1. Plugging operations authorized are subject to the attached "General Require-
    ments for Permanent Abandonment of Wells on Federal Leases."

2. The Farmington office (telephone (505) 325-4572) is to be notified in suffi-
    cient time for a representative to witness all plugging operations.

3. Blowout prevention equipment is required.

4. In addition to normal filling of pits and cleanup of location, additional
    surface restoration work may be required, i.e. ripping of pad and/or access
    road, reseeding, etc. We have asked the Bureau of Land Management for the
    surface restoration requirements for this well and we should be able to fur-
    nish you these requirements within 30 days. After plugging the well and
    before making final clean-up, you should contact this office unless you have
    already been advised as to what additional surface restoration work is
    required.

✳ 5. The following modifications to your plugging program are to be made (when
      applicable):

      a) Perforate 5½" casing at 925' and squeeze cement behind casing
         to 825' and spot cement plug inside casing from 925' to 825'.
      b) Assign to BLM for water well.

Office Hours: 7:30 A.M. to 4:15 P.M.
