☐ New Construction

☐ Non-Routine Fracturing

☐ Water Shut-Off

☐ Conversion to Injection

☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Amoco Production Company request permission to maintain the well in a shut-in status pending further evaluation of possible downhole recompletion. Amoco in performing well-by-well reviews to optimize production rates from the wells associated the El Paso Natural Gas Global Compression Project. The area containing the Warren #1, is scheduled to be reviewed in late 1999. The well review will investigate potential artificial lift opportunities, sand production problems, and Mesaverde recompletion potential. If no production enhancements are identified during the well review, the well will be plugged and abandoned.
