Anoco proposes to drill the above referenced well to develop the Pictured Cliffs reservoir. The well will be drilled using rotary tools with mud as the circulating media. Casing will be set through the Pictured Cliffs on completion. Perforation and stimulation will be based on analysis of the open hole logs. A diagram of the location and the acreage plat are attached. A copy of all logs will be filed with your office upon well completion.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.
