SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to deepen or reentry to a different reservoir.

Use "APPLICATION FOR PERMIT--" for such proposals

SUBMIT IN TRIPLICATE

1. Type of Well
☐ Oil ☒ Gas ☐ Other
☐ Well ☐ Well

2. Name of Operator

Roddy Production Company

3. Address and Telephone No.

P. O. Box 2221, Farmington, NM, 87499, 505 - 325 - 5866

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)

910 ' FNL - 1700 ' FEL, Section 17, T28N, R11W, NMPM

5. Lease Designation and Serial No.

NM - 010063

6. If Indian, Allottee or Tribe Name

7. If Unit or CA, Agreement Designation

8. Well Name and No.

USA - Gentle No. 1

9. API Well No.

30 - 045 - 21928

10. Field and Pool, or Exploratory Area

Pinon Fruitland

11. County or Parish, State

San Juan, NM

TYPE OF SUBMISSION

☐ Notice of Intent
☒ Subsequent Report
☐ Final Abandonment Notice

TYPE OF ACTION

☒ Abandonment
☐ Recompletion
☐ Plugging Back
☐ Casing Repair
☐ Altering Casing
☐ Other

☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

October 15, 1998: Check well. No bubbles out of 2 7/8 " casing stub. Fill bell hole with water to top of 2 7/8 X 5 1/2 " cap. Started out bubbling across entire floor of bell hole with occasional bubbles depleting to nothing indicating this was air displacement out of ground as water soaked in. There was a continuous bubbling out of a pinhole in the 5 1/2 " casing that lasted through out the 15 minutes the well was monitored. The bubbling is minimal, similar to what an air leak in an inner tube does when immersed in water, indicating pressure is minimal. Roddy Production Co. proposes to install a permanent dry hole marker in the 2 7/8 " stub, fill the bell hole with redi mix to confine the pressure to the well, fill the pit, take down the fence, close the road, seed the location and access road, and file a final sundry to complete this P & A.

14. I hereby certify the foregoing is true and correct
