MULTIPOINT AND ONE POINT BACK PRESSURE TEST FOR GAS WELL

Type Test ☒ Initial ☐ Annual ☐ Special				Test Date 3-14-81																																																																																															
Company SUPRON ENERGY CORPORATION				Connection Southern Union Gathering Company																																																																																															
Pool Basin				Formation Dakota																																																																																															
Completion Date 3-4-81		Total Depth 6365		Plug Back TD 6310																																																																																															
				Elevation 5522																																																																																															
Csg. Size 4.500		Wt. 10.50		Perforations From 6055 To 6203																																																																																															
Thp. Size 2.375		Wt. 4.70		Perforations No Perforations																																																																																															
				From To																																																																																															
Type Well - Single - Bordenhead - G.C. or G.O. Multiple Single				Packer Set At -----																																																																																															
Producing Thru Tubing		Reservoir Temp. °F 8		Annual Temp. °F 12																																																																																															
L 6155		H 0.650		Baro. Press. - P ₀ 12																																																																																															
				County San Juan																																																																																															
				State New Mexico																																																																																															
				Prover Meter Run Taps
