P. O. Box 2088
Santa Fe NM 87501

Re: Tenneco Oil Company, Storey C #2E, E-35-28N-9W

Dear Mr. Ramey:

The referenced well had a deviation up to $10\frac{1}{2}^{\circ}$. The total footage deviation was approximately 325 feet. The inclination from vertical would be to the west. The footage location of the well is 1890 FNL 355 FWL. This puts the bottom hole location almost on the section line.

By Rule 111, we recommend that a directional survey be requested on this well. A plat is included showing the offset wells, operators, and proration units. The offset operators will also receive a copy of this letter.

A copy of the deviation report is included. None of the offset wells has a deviation greater than 6° . A list of the offset wells with names, locations, operators, and deviations is included.

If you have any questions please call this office.

Yours truly,

Jeff A. Edmister
Geologist II
