Dear Mr. Arnold:

R & G Drilling Company, Inc. is presently planning a dual completion of its R & G No. 26 (SF 078673) located in the NE $\frac{1}{4}$ of Section 27, T28N, R11W, San Juan County, New Mexico.

This well is to be dually completed in the Fruitland formation and in the Pictured Cliffs formation. So far as is known, this well is not within the boundaries of any designated pool. The dual completion will be a normal tubing annulus completion with a packer separating the producing zones, with a side door valve installation on the tubing for bottom hole pressure tests.

Upon completion and the running of initial potential and packer leakage tests, administrative approval by the Oil Conservation Commission will be requested.

Very truly yours

Mr. Emery Arnold
Oil Conservation Commission
120 East Chaco
Aztec, New Mexico

Dear Mr. Arnold:

R & G Drilling Company, Inc. is presently planning a dual completion of its R & G No. 26 (SF 078673) located in the NE $\frac{1}{4}$ of Section 27, T28N, R11W, San Juan County, New Mexico.

This well is to be dually completed in the Fruitland formation and in the Pictured Cliffs formation. So far as is known, this well is not within the boundaries of any designated pool. The dual completion will be a normal tubing annulus completion with a packer separating the producing zones, with a side door valve installation on the tubing for bottom hole pressure tests.

Upon completion and the running of initial potential and packer leakage tests, administrative approval by the Oil Conservation Commission will be requested.

Very truly yours

R & G DRILLING COMPANY, INC.

Arlene, New Mexico

Dear Mr. Berry:

Re: Drilling Company, Inc. is presently planning a well completion of the H. & W. (SP 17807) located in the NW 1/4 of Section 27, T28N, R10W, San Juan County, New Mexico.

This well is to be drilled in the H. & W. formation and is the planned H. & W. formation. As far as is known, this well is not within the boundaries of any designated pool. The well completion will be a gravel tubing annular completion with a packer separator. The well zones, with a side door valve installation on the H. & W. for bottom hole pressure tests.

Upon completion and the turning of initial production and before leakage tests, administrative approval of the Oil Conservation Commission will be required.

Very truly yours,

H. & W. Drilling Company, Inc.

Walter G. Smith, President
