(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Farmington, New Mexico May 2, 19 56

Well No. 76 is located 990 ft. from N line and 1450 ft. from W line of sec. 23

SW/4 of Section 23 T-28-N R-12-W NMPN
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
West Kuts-Pictured Cliffs San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5736 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On April 11, 1956, well was spudded and on April 12, 1956, 9-5/8" casing was landed at 98 feet and cemented with 120 sacks cement. After waiting on cement for 24 hours, casing and water shut off were tested with 500 pounds pressure for 30 minutes with no drop in pressure. Drilling operations were resumed.

On April 15, 1956, 5-1/2" casing was landed at 1620 feet and cemented with 125 sacks cement. After waiting on cement for 36 hours, water shut off was tested with a two hour bailing test. Test proved successful. Completion operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
