June 11th, 19 60

Well No. 1 is located 720 ft. from N line and 720 ft. from E line of sec. 17

SE/4 SE/4 Sec. 17 28N 13W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6026 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well was completed as a Dakota gas well. It is proposed to set a packer at approximately 5700', make three abrasijet cuts in the Gallup formation at approximately 5660', sand-oil treat the Gallup formation, and attempt to dually complete the well as a Dakota-Gallup well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company BENSON-MONTIN-GREER DRILLING CORP.

Address 158 Petroleum Center Building

Farmington, New Mexico
