On March 9, 1990, Hicks Oil & Gas, Inc. submitted a 1990 Plan of Development for the S.E. Cha Cha Unit. This plan was developed by the owners of the lease based on what the lease could support economically. Any added economic burdens such as additional well plugging and casing integrity tests will surely cause the unit to become uneconomical to operate.

An approved copy of the 1990 Plan of Development is attached for your review. It is respectfully requested that you let this plan remain as is.

Sincerely,

Jim Hicks
Hicks Oil & Gas
