

WELL NO. 5 LEASE Gallegos Canyon UnitOPERATOR Benson & Montin

WELL DRILLING AND COMPLETION HISTORY

DATE		REMARKS
10-5-51		Moving out rotary
10-6-51		Moved in cable tools
10-7-51	8:00 AM	Drilling cement at 1370.
	3:00 PM	Drilled through cement. Well unloaded 1000' water out of hole.
	6:00 PM	Measured 67" water through 2" (970 MCF)
10-8-51	7:30 AM	Let well blow all night. Ran tools for first time after hole unloaded yesterday. Fine spray of rotary mud preceded tools out of hole. Ran bailer, recovered rotary mud only, no water. (14 hour test). Measured 134" water through 2" (1,370 MCF).
	6:00 PM	Ran 1368' 1" tubing Measured 10" Mercury through 2" (1,370 MCF) 27 hours after drilling plug.
10-9-51		Killed well. Preparing to plug back with calseal and load shot. Spotted calseal plug on bottom 1441-70. Loaded 110 qts. SNG 1394 to 1441. Tamped with 5' gravel 1389-94 and 8' calseal below shoe and 52' calseal in casing.
10-10-51	2:00 PM	While drilling plug at approximately 1390 and running bailer well blew out. Left bailer and part of line in hole.
	8:00 PM	Measured 29½" water through 5" (4,000 MCF) with spray of water after open 6 hours.
10-11-51	11:00 AM	Tried to pick up bailer with latch jack unsuccessfully. Preparing to kill well. Measured 19" WATER through 5" (3,200 MCF) after open 21 hours. Water decreasing.
	6:00 PM	Killed well with water. Estimated 10 bbl. water in formation. Shut down over night.
10-12-51	8:00 AM	Well not dead. Preparing to kill again.
	4:00 PM	After shutting in pressure built up to 265#. Unloaded water from hole.
	6:00 PM	Killed well with 10 bbl. of heavy gel mud and 50 bbl. of water. Well took about 25 bbl. more water than necessary to fill hole.
	9:00 PM	Commenced fishing. Ran latch jack and found wire marks.
	11:00 PM	Recovered bailer with grab. Swabbed well in.

1. The first group of people who are interested in the results of the study are the researchers themselves. They want to know if the study was successful in achieving its goals and if the results are consistent with their expectations. 2. The second group of people who are interested in the results of the study are the participants. They want to know if the study was fair and if the results are consistent with their own experiences. 3. The third group of people who are interested in the results of the study are the stakeholders. They want to know if the study was useful and if the results are consistent with their own interests. 4. The fourth group of people who are interested in the results of the study are the general public. They want to know if the study was interesting and if the results are consistent with their own beliefs. 5. The fifth group of people who are interested in the results of the study are the media. They want to know if the study was newsworthy and if the results are consistent with their own reporting. 6. The sixth group of people who are interested in the results of the study are the policymakers. They want to know if the study was relevant and if the results are consistent with their own policies. 7. The seventh group of people who are interested in the results of the study are the educators. They want to know if the study was educational and if the results are consistent with their own teaching. 8. The eighth group of people who are interested in the results of the study are the employers. They want to know if the study was practical and if the results are consistent with their own business. 9. The ninth group of people who are interested in the results of the study are the consumers. They want to know if the study was helpful and if the results are consistent with their own needs. 10. The tenth group of people who are interested in the results of the study are the community. They want to know if the study was beneficial and if the results are consistent with their own values.
