

WELL NO. 5 LEASE Gallegos Canyon UnitOPERATOR Benson & Montin

## WELL DRILLING AND COMPLETION HISTORY

| DATE     | REMARKS  |
|----------|--|
| 10-13-51 | 7:00 AM Measured 19" water through 5" (3,200 MCF) with fine spray water and aquagel. Rigged up stripper head and ran 67 joints 1" siphon line to 1418'. Shut in well at 4:00 PM. Water had decreased and well had quit making mud. |
| 11-1-51  | Took State potential test.<br>Shut in pressure 461#.<br>Open 3 hours - measured 4,830 MCF by conventional pilot tube tables. (4,100 MCF by B & M Calculations)   |

WELLING HISTORY

WELL DRILLING AND COMPLETION REPORT

REMARKS

DATE

7:00 AM. Reservoir 19" water surface 5' (5,200 LCI) with fine  
spray water and gravel. 11' up to 11' 11" and ran 67 joints 19" at 11' 11" and  
in well at 11:00 PM. Water had decreased and well  
had quite making mud.

10-18-51

Work done potential test.  
Test in pressure 11' 11".  
Open 3 hours - reservoir 19" water surface 5' (5,200 LCI) at conventional  
gives some results. (5,100 LCI) at 11' 11" and 11' 11" calculations

11-1-51
