Re-enter U.S.A. Well

17. DESCRIBE PROPOSED OR COMPLETED OPERATION (Indicate state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well was drilled and completed in the Gallup formation in 1963. A DV cementing tool was set at 1830' and 100 sacks of cement were circulated across the Pictured Cliffs interval. The well was plugged in May, 1967, leaving all the casing in the hole.

It is proposed to re-enter this well and drill out any necessary cement plugs to 1750'+. A drillable bridge plug will be set at 1730'+ and the Pictured Cliffs formation perforated, tested and, if commercial, put on production.

SEP 20 1967

18. I hereby certify that the foregoing is true and correct
