17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

This well was drilled and completed in the Gallup formation in 1962. A DV cementing tool was set at 1760'+ and 150 sacks of cement were circulated across the Pictured Cliffs interval. The well was plugged in May, 1967, leaving all the casing in the hole.

It is proposed to re-enter this well and drill out any necessary cement plugs to 1500'+. A drillable bridge plug will be set at 1450'+ and the Pictured Cliffs formation perforated, tested and, if commercial, put on production.
