Re: Your letter dated October 11, 1985 ( Pit on Fed. 3-11 Well, Lease  
# NM 0338690)

Dear Mr. Chavez:

On or about October 15, 1985, I called you and discussed this letter with you and indicated some other information given to you about the water at this well. You instructed me to contact the land owner and see what he wanted to do.

I contacted the land owner during the last week in October 1985, and we agreed on the changes that were satisfactory to him.

I called you and indicated to you the things the land owner wanted and you instructed me to write this letter along with the attached proposal to be approved by your commission.

I also feel the land owner will probably try to change things on down the road. I thank you very much for your help and consideration and understanding in this matter.

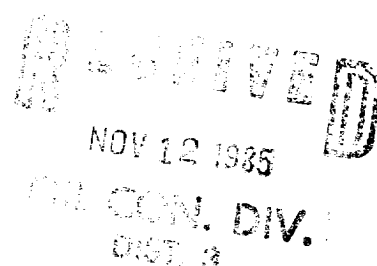

Sincerely,

Ralph Abbott  
Owner & operator

Re: Federal 11 #3 I-11-<sup>28N</sup>~~29N~~-13W Pit

Dear Mr. Abbott:

The pit at the referenced well is leaking again. Weather has deteriorated the plastic liner and the Aqua-gel is not adequate to contain the water.

Within 60 days, submit a plan to this office for replacing the pit.

This well produces a significant volume of water but you have not shown any water production on your C-115's. Please correct that oversight on all future reports.

Our field inspection found that water is leaking around the polish rod stuffing box. Please have this repaired immediately.

Sincerely,

Frank T. Chavez  
District Supervisor
