proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.)*

The original Application For Permit To Drill was filed, and approved, on the basis of drilling through the Fruitland Formation. It is now proposed to drill through the Pictured Cliffs Formation to an estimated total depth of 2040'. If it is determined that a completion of the Pictured Cliffs will not be attempted at this time, production casing will be set through the Pictured Cliffs and cemented in such a manner to have cement inside and outside the casing, through the Pictured Cliffs and 50' above the Pictured Cliffs Formation. The well will be then completed in the Fruitland Formation.
