REF: Curtis J. Little, Operator
Federal Comm, Well No. 2-E
Unit N, Section 11-T28N-R13W
San Juan County, New Mexico
Hardship Gas Well Classification
Order No. R-7784

Dear Mr. Stamets:

As per Order No. R-7784, this is a request on behalf of the above-referred-to operator, for extension of the Hardship Classification past May 31, 1986, for the above-referred-to well.

It is also requested that the extension be for one (1) year or until May 31, 1987.

Due to the Hardship Classification, the well maintained a good producing condition since November 1984. It has not been necessary to swab or use any other method to remove water from the well.

The following is a tabulation of the production from the well:

<u>YEAR</u>	<u>MONTH</u>	<u>MONTHLY PRODUCTION MCF</u>	<u>PRODUCING DAYS</u>	<u>DAILY AVERAGE MCF</u>
1985	June	2,548	30	85
	July	2,516	31	81
	August	2,872	31	92
	September	2,381	30	79
	October	2,800	31	90
	November	2,099	30	70
	December	2,984	31	96
1986	January	2,421	31	78
	February	2,266	28	81
	March	2,498	31	81

RECEIVED

APR 21 1986

OIL CON DIV
D-1

-2-

The producing rate did exceed the 88 MCF per day approved maximum rate during three (3) of the producing months. The reason for exceeding the 88 MCF per day was due to lower than normal gathering line pressure during those months.

According to the April 1985, Northwest Gas Proration Schedule, the proration unit in which the well is located was not overproduced or underproduced.

As presented during Case No. 8217, any extended shut in period for the well, will in all probability, affect the volume of gas that could ultimately be recovered from the reservoir. The affect would be due to produced water extrusion and damage of the reservoir.

Thank you for your consideration in granting an extension of the Hardship Classification for one (1) year.

Very truly yours,

Ewell N. Walsh, P.E.
President
