17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

In order to increase production and improve the mechanical condition of this well it is intended to perform a workover as follows:

Pull tubing & set a drillable bridge plug near the casing shoe or cut the tubing below the 7" casing and squeeze the open hole below a drillable retainer.

Test 7" casing and squeeze cement through existing leaks or perforate at the base of the Ojo Alamo and block squeeze with cement.

Clean out existing open hole and set 4 1/2" production casing or drill a new side-tracked hole through the Mesa Verde pay and set 4 1/2" production casing.

Selectively perforate and sand-water fracture the Mesa Verde, clean out and run tubing.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
