13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Amoco is asking for continued shut in status. This well has high pressure but low producing rates when opened. We believe that it is suffering from a "water block" problem caused by the overuse of kill fluids during previous work. We plan on working over this well, ie treating this well with surfactant and nitrogen later in the spring/summer to remove the water block.
