13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

In response to NMSF-079487A (WC) dated 11/7/01

This well was Plugged and Abandoned through the Fruitland, and the casing tested to 500 psi, and Temporary Abandoned. Currently we are in the process of drilling a SWD well in Sec 26, T30N, R4W. Our technical staff feels this wellbore has potential as a Fruitland Coal completion once a disposal well is available to handle the produced water. Since the casing is in good shape, this is an ideal candidate for a completion to test the coal adequately in this wellbore. It is requested to leave the well T&A'D until 11/1/2002 to complete a geological study and recompleate the well in the Fruitland Coal.
