☒ Other - Payadd

☐ Change of Plans

☐ New Construction

☐ Non-Routine Fracturing

☐ Water Shut off

☐ Conversion to Injection

13. Describe Proposed or Completed Operations

The subject well is a 2000 Lewis Shale payadd in 7" and 4 1/2" casing. This well was drilled in 1996 and was completed in the Mesaverde formation. The Pt. Lookout/Lower Menefee was stimulated w/ approximately 130,000 lbs. total sand and 139,150 gal. total slickwater. The Cliffhouse/Upper Menefee interval was stimulated w/ approximately 120,000 lbs. total sand and 126,739 gal. total slickwater. The Lewis will be perforated and fracture stimulated in two (2) stages with 417 total tons of liquid CO2 and 95,000 lbs. total 30/50 mesh sand. The new stimulation technique will test the viability of liquid CO2 and sand stimulation within the Lewis Shale interval. The well will then be cleaned-up, tubing landed in the Mesaverde and placed on production.

14. I hereby certify that the foregoing is true and correct.
