17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The subject well was shut in as per BLM approval in August, 1987. A casing integrity test was performed in September, 1988. A more recent casing integrity test was performed on July 17, 1989. The subject well held 1000 PSI for 15 minutes.

Texaco requests the additional shut in approval since it has no plans for the existing wellbore and the wellbore poses no environment hazard.

Your cooperation and consideration is appreciated.
