

WELL No. 2 Gallegos Canyon Unit
OPERATOR Benson & Montin

LOCATION SUMMARY

SCHEDULE OF DATES	MONTH	DAY	YEAR
LOCATION MADE	8	1	51
POTARY RIGGING	8	27	51
DRILLING COMMENCED	8	28	51
DRILLING COMPLETED	9	5	51
FIRST PRODUCTION			
POTENTIAL TEST			
OFFICIAL COMPLETION			
PLUGGED & ABANDONED			
Temp. abandoned	9	6	51

LOCATION DATA

WELL NAME **Wildcat**

COUNTY **San Juan** STATE **New Mexico**

SECTION **1650** T10N R10E S10W

NE **1650** E10N **East** S10W **West** LINE OF

35 TOWNSHIP 29N RANGE 12W

5370' 5380'

5370'

BRIEF DESCRIPTION OF WELL

Drilled to 1448' T.D. with rotary. Cored 1332 to 1448. DST 1337-1448. Recovered 20' mud, no show of gas.
Set 10-3/4" surface casing @ 102'.
Set 8-5/8" intermediate casing @ 272' to shut off Ojo Alamo water sand.
Temporarily abandoned.

This is one of six initial exploratory wells drilled to test the Pictured Cliffs formation. Present information does not justify setting casing to test well. Correlation with information developed on future wells may later indicate the advisability of setting casing and shooting with nitro-glycerine in an effort to obtain production.
