(Field) (Coun	ty or Subdivision)		(	CON. CC
	AILS OF W	I lengths of proposed cas	ings; indicate muddin	ng jobs, coment-
te names of and expected depths to objective sands; showing points, and s	sizes, weights, and all other important	lengths of proposed case proposed work)	ings; indicate muddin	garface.
Propose To: Set 300 feet of Drill with rotary to approximation. Non-stage the Pictured Cliffo formation (alley formation with four stages)	sizes, weights, and all other important  6 5/6" max make total mediantical mediantical mediantical mediantical mediantical mediantical mediantical	lengths of proposed case proposed work)  rface cassing a depth of 986 cassing to total lar approximate to total large case continues to total large case case continues to total large case continues to total large case case continues to total large case case case case case case case cas	ings; indicate mudding and company to the through the contract and in Forfernia at 20,000 cm.	
Propose To: Set 300 feet of Drill with rotary to approximate the Pictured Cliffe formation with four the Pictured Cliffe forma	all other important  8 5/8' more mate total reduction commet solin metal seman metal seman metal sol	lengths of proposed case proposed work)  reace costing a depth of 5656 anding to total lar approximation to with 150 and cost.  O galo. oil as a house to woll.	nd count to ift, or thro identh and may 100 feet in Ferferate at 20,000f an	emysace.  with  woment  below  the
Propose So: Set 300 feet of Drill with rotary to approximate the Pictured Cliffo formation with four Section 2 3/8" tubing.	all other important  8 5/8' more mate total reduction commet solin metal seman metal seman metal sol	lengths of proposed case proposed work)  reace costing a depth of 5656 anding to total lar approximation to with 150 and cost.  O galo. oil as a house to woll.	nd count to ift, or thro identh and may 100 feet in Ferferate at 20,000f an	emysace.  with  woment  below  the
Fragone 30: Set 300 feet of Drill with rotary to approximation. Sun 16 section of the Pictured Cliffs feathers and the Pictured Cliffs feathers Called feathers with four the Pictured Cliffs for the Pictured Cliffs feathers with four the Pictured Cliffs feathers with feathers wit	sizes, weights, and all other important is 5/8" and same total production of the same same same same same same same sam	lengths of proposed case proposed work)  reace costing a depth of 5656 anding to total lar approximation to with 150 and cost.  O galo. oil as a house to woll.	nd count to ift, or thro identh and may 100 feet in Ferferate at 20,000f an	emysace.  with  woment  below  the
Propose 30: Set 300 feet of Drill with rotary to approve the Pictured Cliffe formation the Pictured Cliffe formation Callup formation with four Section 1/8 tubing.  Spins 1, 40 seres, Section understand that this plan of work must receive approve mpany Aster Cil and Cas Company	sizes, weights, and all other important is 5/8" men to total greature tions on the total parts of total parts of the total parts of total	lengths of proposed case proposed work)  Frace cooling a depth of 5850 total age to total lar approximate with 130 cm.  O gale. oil as depth of well.	nd count to  if the or thro  it depth and  in Forfaceta  it 20,000f an	garface.
Propose 3s: Set 300 feet of Drill with rotary to approximately to approximately to approximately formation. Here is a substant of the Pictured Cliffe formation with four faculty formation with superconsiminately formation for the faculty formation with superconsiminately formation of the faculty formation with superconsiminately for a superconsiminately formation of the faculty for	sizes, weights, and all other important is 5/8" men to total greature tions on the total parts of total parts of the total parts of total	lengths of proposed case proposed work)  Frace cooling a depth of 5850 total age to total lar approximate with 130 cm.  O gale. oil as depth of well.	nd count to  if the or thro  it depth and  in Forfaceta  it 20,000f an	garface.
Propose So: Set 300 feet of Drill with rotary to approve Soil with rotary to approve Soiling formation. Here is with \$10 ac. Set two-stage the Pictured Cliffs formation the Pictured Cliffs formation with four stage College formation with four stage.  Sepist 1, to seree, Section of understand that this plan of work must receive approve the party of the Company Asset Oil and the Company Asset Oil and the Company Company Company Stage Oil and the Company Company Company Stage Oil and the Company Stage Oil	sizes, weights, and all other important is 5/8" men to total greature tions on the total parts of total parts of the total parts of total	lengths of proposed case proposed work)  Frace cooling a depth of 5850 total age to total lar approximate with 130 cm.  O gale. oil as depth of well.	nd count to  if the or thro  it depth and  in Forfaceta  it 20,000f an	garface.
Propose So: Set 300 feet of Drill with rotary to approve Soil with rotary to approve Soiling formation. Here is with \$10 ac. Set two-stage the Pictured Cliffs formation the Pictured Cliffs formation with four stage College formation with four stage.  Sepist 1, to seree, Section of understand that this plan of work must receive approve the party of the Company Asset Oil and the Company Asset Oil and the Company Company Company Stage Oil and the Company Company Company Stage Oil and the Company Stage Oil	sizes, weights, and all other important is 5/8" men to total greature tions on the total parts of total parts of the total parts of total	lengths of proposed case proposed work)  Frace cooling a dayth of 5856 to take the total lar approximation to take 130 or total and the well.  Geological Survey before the cooling to the well.  ORIGINAL SI By	nd count to  It. or thro  I doubt and  Dly 100 fort  Forfareta  20,000f and  coperations may be co	below the
Propose So: Set 300 feet of Drill with rotary to approve Soling Formation. But of prints formation. But of the Pictured Cliffs formation the Pictured Cliffs formation Callup formation with four the Pictured Cliffs formation Callup formation C	sizes, weights, and all other important is 5/8" men to total greature tions on the total parts of total parts of the total parts of total	lengths of proposed case proposed work)  Frace cooling a depth of 5850 total age to total lar approximate with 130 cm.  O gale. oil as depth of well.	nd count to  It. or thro  I doubt and  Dly 100 fort  Forfareta  20,000f and  coperations may be co	below the
Propose To: Set 300 feet of Drill with rotary to approximately formation. But 100 feet of Drill with rotary to approximately formation. But 100 set 10	sizes, weights, and all other important  6 5/6" max make total mediantical mediantical mediantical mediantical mediantical mediantical mediantical	lengths of proposed case proposed work)  rface cassing a depth of 5656 anning to total lar approximation to with 150 and 150 a	nd count to ft. or thro il depth and mly 100 feet i. Ferforate
