Att: Mr. R. J. Carlin
Assistant Production Superintendent

Dear Mr. Carlin:

We are enclosing a Form C-104 originally submitted on August 11, 1953 and approved by this office on Delhi #1-X Bradley in the NE/4 35-29N-9W and also Form C-110 filed on September 30 for the reason of change in transporter. I believe that both of these forms refer to the same well and that it should be the Delhi #1-X Bradley and according to our card file the location should be 1325' from North and 2100' from East, Section 35-29N-9W; however this does not correspond with the footage shown on the C-104 submitted by you.

Will you please check your files and re-submit Form C-104 and C-110 on this well with the location corrected. Although we have no file on the original Delhi #1 Bradley I believe it was lost due to collapsed casing. If you recall what happened we would appreciate a brief history on this well too.

Yours very truly,

Emery C. Arnold
Oil & Gas Inspector
