Gallegos Canyon Unit Farmington, New Mexico July 6, 19 61

Well No. 25 is located 460 ft. from S line and 1900 ft. from SE line of sec. 26

SE 1/4 SW 1/4 of Section 26 T-29-N R-13-W N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

West Gate Pictured Cliffs San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5821 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of the above well ceasing to produce gas in commercial quantities we propose to plug and abandon it as follows:

1. Rig up unit and pull tubing.
2. Pump 20 sacks cement plug down 5-1/2" casing to cement open hole section from 1627-1652.
3. Fill hole with fluid.
4. Pump 15 sacks cement plug down 8-5/8" - 5-1/2" annulus.
5. Cut off well head.
6. Erect abandonment marker, spot 5 sacks cement surface plug and clean up location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
