RE: Orville Slaughter (Slaughter) Sangre De Cristo #4 Spill Clean Up and Pit Closure

Dear Mr. Slaughter:

The New Mexico Oil Conservation Division (OCD) has reviewed the documentation of your remediation activities at the Sangre De Cristo #4, G-29-29N-10W submitted by Onsite Technologies (Onsite). The remediation activities are detailed in the report dated October 18, 1999. The excavation closure is documented on the "Pit Remediation and Closure Report" dated October 22, 1999, for a probable tank drain pit rather than the drip pit reported. The remediation/closure activities are approved based on the information submitted.

1) Sangre De Cristo #4, *Tank Drain* (Drip)

G-29-29N-10W

Please be advised OCD approval does not relieve Slaughter of liability if remaining contaminants are found to pose a threat to surface water, ground water, human health or the environment. OCD approval does not relieve Slaughter of compliance with other federal, state, tribal or local laws and regulations.

If you have questions please feel free to call me at 505-334-6178 ext 15.

Yours truly,

Denny G. Foust  
Environmental Geologist
