Re: New Mexico 03999

Dear Sir:

The following is an account of this week's drilling progress on
El Paso Natural Gas Company's Public Land leases:

New Mexico 03999, San Juan Production Company,
No. 1 Granbling:

Moved on cable tools and drilled to 4300' in
cement plug.

Bailed casing dry and tested for water shut-
off for 6 hours.

Finished drilling plug and drilled ahead to
4330' with slight show of gas.

Now drilling at 4408' with slight show of gas
(approx. 139 MCF).

I am enclosing a copy of the weekly letter to Mr. Frost concerning
the Ute No. 6 on Ute Mountain lease I-22-Ind-2772.

Thank you.

Yours very truly,

E. J. C.

E. J. Coal
Petroleum Engineer
