Re: Paul Case #6 Sullivan
B-25-29N-11W

Gentlemen:

The above well was completed in December, 1958 and was drilled to a total depth of 1800', with 5 $\frac{1}{2}$ " casing cemented at 1800' with 150 sacks. However no gauge of production was ever reported and we presume that the well was not commercially productive.

We are, therefore, directing that the well be plugged and abandoned in accordance with New Mexico Oil Conservation Commission Rules and Regulations. Please file Form C-102 indicating your proposed plugging program for approval prior to plugging.

In the event we have not heard from you regarding the well prior to September 1, 1963 it will be our intention to set the matter for hearing before the Oil Conservation Commission to have the operator and the bonding company show cause why the well should not be properly plugged and abandoned.

Yours very truly

Emery C. Arnold

Re: Paul Case #6 Sullivan
B-25-29N-11W

Dear Mr. Arnold:

Our Sullivan #6 well has been producing since its' completion in December, 1958.

We feel sure the required forms were submitted. However, we are writing Mr. Thomas Dugan, who is taking care of our wells in that area, and are asking him to write you concerning this.

Very truly yours,

Paul Case
