March 21, 19 61

**Total**  
Well No. 1-A is located 510 ft. from N line and 510 ft. from E line of sec. 30  
NE 1/4 30 29N 13W S.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
**Total** San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill an 11" hole to approximately 200' cementing 8 5/8" surface casing at that point with sufficient cement to circulate back to surface. 7 7/8" hole will be drilled to a total depth of approximately 5400' to test the Gallup formation. If production is encountered 3 1/2" 14 lb. casing will be cemented at a total depth with 150 sax, using an additional 150 sax through a H.V. tool set approximately 100' below the Picture Cliff formation. All cement jobs will be tested in accordance with regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
