13 Describe Proposed or Completed Operations

Meridian requests that the Albright #5 remain shut-in, in its present condition for one year.

The subject well is unable to produce against existing pipeline pressure, however the well cannot produce at a rate sufficient to justify wellhead compression. Meridian will evaluate options for reducing the pipeline pressure with the operator of the line (GCNM). This wellbore is mechanically sound, as indicated in the attached bradenhead test report.

14 I hereby certify that the foregoing is true and correct.
