

OIL CONSERVATION COMMISSION
1000 RIO BRAZOS ROAD
AZTEC, NEW MEXICO

January 5, 1965

Mr. Norman King
Box 186
Dolores, Colorado

Dear Mr. King:

Following is a summary of 1963 and 1964 gas and distillate production from the Sunray New Mexico State "Z" well, located in the SE $\frac{1}{4}$ of Section 2, 29N-14W. Total 1963 production was 34,341 MCF of gas and 319 barrels of distillate. The 1964 monthly summary is as follows:

	<u>GAS MCF</u>	<u>DISTILLATE BBLs</u>
January	41	0
February	1784	25
March	2370	23
April	2507	9
May	2260	20
June	1606	18
July	1815	0
August	1600	0
September	1952	0
October	<u>1059</u>	<u>0</u>
TOTAL	16,994	122

The total production to November 1, 1964 is 108,506 MCF of gas and 1,077 barrels of distillate. At \$2.50 per barrel on distillate and 13¢ per MCF on the gas the value would be approximately \$2,592. on the oil and \$14,105 on the gas. If you own a full 40 acre mineral interest in this 320 acre unit your royalty to date should be approximately \$220. total on gas and \$40. on oil. These figures are approximate, but should be close.

I hope that you find the above information useful.

Yours very truly,

Emery C. Arnold
Supervisor, District #3
