Hutchinson No. 1
A-Sec. 1-T29N-R13W

Dear Mr. Broome:

I have contacted the New Mexico Oil Conservation Commission, Aztec, New Mexico, and Mr. Emery Arnold stated that it will not be necessary to prepare a Well Deliverability Test Report for the above-referred-to well. It is not necessary to prepare the report due to the well only having 40 acres assigned and the allowable is presently being assigned on a monthly basis of 1,500 MCF per month.

If you desire to have a deliverability test conducted on the above-referred-to well, it is necessary to have the following information:

1. Deadweight flowing pressures of:
 - a. Tubing
 - b. Casing
 - c. Meter
 - d. Static reading of meter at time of deadweight pressure of meter.
 - e. Date pressures recorded.
2. Deadweight shut in pressures of:
 - a. Tubing
 - b. Casing
 - c. Date of shut in pressure.

It would be necessary to re-schedule the deliverability test with Southern Union Gas Company in order to obtain the necessary pressure information.

Enclosed is the information you received from Southern Union Gas Company. I have kept a copy for my files.

Very truly yours,

Ewell N. Walsh, P. E.
President
