Re: Navajo 17G #93, G-17-29N-18W #
2638/N; 1690/E

The last correspondence we had on this well was the C-104 approved in May 1981, for change of ownership. You were listing it at this time as temporarily plugged & abandoned.

Since the time the USGS had your wells re-surveyed and renamed some of the wells, I am now showing two wells at the above location with the same name and well number. I believe that the above well has been plugged and abandoned and that the one located 2311 FNL & 1368 FEL is the producing well.

Could you please research your files on the well 2368 FNL & 1690 FEL and send me the forms approved through the USGS at the time of plug and abandoning. This will help me to clear our records.

Thank you,

Luanne Kisel
