This letter will confirm our telephone conference today regarding surface commingling the above referenced two wells. Both wells are producing from the Basin Dakota Pool and are dedicated to the E/2 Section 10, T29N R13W gas proration unit. Amoco plans to use a single set of production equipment and sales meter for the two wells. We will allocate production from the two wells on the basis of well tests in consultation with your office. It is my understanding that no further approvals are necessary. Please contact me at (303)-830-5072 if there are any questions regarding this matter.

Sincerely,
