The elevation of the derrick floor above sea level is 6437 ft. (RMB)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

9-5/8" casing was set at 3702' with 800 sacks of cement with 6% gel, followed by 100 sacks neat cement. Good circulation throughout cement. Tested casing with 2000 psi, which held with no indication of pressure drop. Top cement 700' by temperature survey. Rigged up to drill with gas. Tested 9-5/8" casing with 1200 psi for 30 minutes, which held with no indication of pressure drop. Resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
