NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, Mike Turnbaugh, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by Northwest Pipeline Corporation in the capacity of
Drilling Engineer, that on April 13, 1981

I personally supervised the setting of a Baker Model "D" Packer
Make & type of packer
in Northwest Pipeline, Rosa Unit
Operator of well Lease name

Well no. 77 located in the Blanco MV & Basin Dakota field,
Rio Arriba county, state of New Mexico, at a subsurface depth of
6030' feet, said depth measurement having been furnished me by
Gearhart Wireline;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Mike Turnbaugh
