FARMINGTON, N. M.

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Farmington, New Mexico **May 12**, 1953

Well No. **1** is located **990** ft. from **N** line and **990** ft. from **E** line of sec. **33**

NE 1/4 of Section 33 (1/4 Sec. and Sec. No.) **T-30-N** (Twp.) **R-9-W** (Range) **NPM** (Meridian)
Blanco Mesaverte (Field) **San Juan** (County or Subdivision) **New Mexico** (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (To be reported later.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 5100 feet. Rotary tools will be used to total depth. Casing will be set on top of Cliffhouse. Mesaverte formation will be drilled with gas and cleaned out with gas after shot with SNK.

The following casing program is proposed:

Size	Depth	Cement	Remarks:
9-5/8"	250'	225	175% of calculated amount to circulate.
7"	4100'	300	150% of calculated amount to fill 1260' above shoe.

Copies of location plats are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
