Mr. Emery C. Arnold
Supervisor, District #3
1000 Rio Brazos Road
Aztec, New Mexico

Dear Mr. Arnold,

Received your "Notice of Over-Production" for the Service Pipe & Supply Oswell #1 well located in the Oswell-Farmington Pool showing the amount of over-production.

When Mr. Angle was in your office in August he ask your advise about making form C-116 and in turn form C-116 was submitted the latter part of August.

Along with the "Notice of Over-Production" was Allowable for the Oswell well from August 22 through 31st and the Allowable Assignment for the month of September.

At the bottom of this "Notice of Over-Production" you ask that we give this matter our prompt attention. What further information do you desire or is there something else that should be done. Our pumper called last night from Aztec and said the well had been shut in for lack of some report. I talked to Mr. Mose Armstrong here and as long as we had received our allowables for a portion of August and September he didn't know what other form might be necessary, but he suggested I write you and find out what is necessary to get the well in order. Please advise and we will do what ever is necessary.

Very truly yours,

SERVICE PIPE & SUPPLY, INC.
