The elevation of the derrick floor above sea level is - ft. 5046' Ungraded Ground.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 325' to the Sensatee Formation. If production is found, casing will be set and cemented with required amount of cement. Native mud and water will be used in drilling. Shows will be tested and electric logs run prior to setting casing or abandonment. Stimulation treatments may be employed in completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
