DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to work over the above well as follows:

1. Move in and rig up workover rig.
2. Clean out hole with gas to total depth.
3. Run 5" casing to total depth and cement.
4. Drill out cement and perforate selected zones.
5. Stimulation with sand-water frac contingent on natural test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
